Urea Prills, Industrial, Agricultural, Common Name: Urea, Dry Formula: CO(NH₂)₂ Synonym: Urea Granular Use: Feed

Section II - Composition/Information On Ingredients

CHEMICAL NAME(s)	CAS No.	Exposure Limits							% by	
		OSHA PEL		TLV - TWA		STEL		CEIL		Weight
		mg/m ³	ppm	1						
Urea, Carbamide, Carbonyldiamide, Carbamidic Acid ⁽¹⁾	57-13-6	5 ⁽²⁾		10 ⁽³⁾						97.5 - 99.7
Alkalinity as Ammonia										150 PPM (Max)
Urea										97.5 – 99.7
Biuret										0.00 - 1.50
Methylenediurea ⁽⁴⁾										0.00 - 2.42

- (1) Nuisance dust 15 Mg/M3 (Total)
- (2) 5 Mg/M³ Respirable (particulate) Fraction Urea.
- (3)10 mg/m³ inhalable particulate

Ingestion:

Inhalation:

(4) Reagent and ChemicalGrade Urea does not contain formaldehyde

Section III - Hazard Identification

Section III - Haza	rd identification							
Potential Acute Health Effects:	Skin : Repeated or prolonged contact may cause reddening, itching and inflammation. Ingestion : A single dose of 100 grams has reportedly caused mild symptoms of Central Nervous System depression e. g. drowsiness and slow reflexes.							
Eyes and Skin:	Eyes : Severe irritant. Contact with heated material may cause thermal burns Skin : Slightly irritating. Repeated or prolonged contact may cause reddening, itching and inflammation. Contact with heated material may cause thermal burns.							
Inhalation:	May cause respiratory tract irritation although no incidents of dust inhalation health effects have been reported							
Ingestion:	May cause gastrointestinal disturbances. Symptoms may include irritation, nausea, vomiting and diarrhea.							
Potential Chronic Health Effects:	None known. Urea is a naturally occurring chemical in the body. It is an end product of protein metabolism and is excreted in the urine.							
Carcinogenicity Lists:	IARC Monograph: No NTP: No OSHA: No							
Section IV - First	Aid Measures							
Eyes:	Promptly flush with water, continuing for 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. If irritation persists, consult a physician immediately.							
Skin:	Wash area of contact thoroughly with soap and water. For contact with molten product do not remove clothing. Flush skin immediately with cold water. Launder clothing before reuse.							

Do not induce vomiting. Keep affected person warm and treat for shock. Get medical attention. A single dose of 100

Remove affected person from source of exposure. If not breathing, ensure open airway and initiate CPR. If breathing

grams has reportedly caused mild symptoms of Central Nervous System depression (drowsiness, etc.).

is difficult, administer oxygen; if available get medical attention.

Product Name:	•		Page 2 of			
Section V - Fire Fi						
Flash Point: Lower Explosive Limit:	Not Applicable Not Available	Autoignition Temperature: Upper Explosive Limit:	Not Available Not Available			
Unusual Fire and Explosion Hazards:		es to Biuret, Ammonia, and Nitrogen Oxides. ng injury without early signs and symptoms.	Short-term exposures to smoke and			
Extinguishing Media:	All standard agents are acceptable. Use extinguishing agent suitable for the surrounding fire. Material itself burns with difficulty. Urea becomes slippery when wet. – Guard against slips and falls					
Special Firefighting Procedures and Equipment:	Irritating toxic substances may be emitted upon thermal decomposition. Exposed firefighters should wear NIOSH approved self contained breathing apparatus with full face piece and full protective clothing. May form explosive mixtures if mixed with strong acid (Nitric/Perchloric). Ventilation: Provide local or general ventilation to keep below nuisance dust limit of 15 mg/m ³ .					
Section VI - Accid	ental Release Measures					
Small Spill:	If uncontaminated, recover and re	euses as product.				
Large Spill:	Prevent large quantities from con	tacting vegetation or waterways. Keep anim	als away from large spills.			
Release Notes:	If spill could potentially enter any waterway, including intermittent dry creeks, contact the local authorities. If in the U.S., contact the US COAST GUARD NATIONAL RESPONSE CENTER toll free number 800-424-8802. In case of accident or road spill notify: CHEMTREC IN USA at 800-424-9300; CANUTEC in Canada at 613-996-6666 CHEMTREC in other countries at (International code)+1-703-527-3887.					
Comments:	See Section XIII for disposal information and Section XV for regulatory requirements. Large and small spills may have a broad definition depending on the user's handling system. Therefore, the spill category must be defined at the point of release by technically qualified personnel.					
Section VII - Hand	ling and Storage					
Ventilation:	Provide local or general ventilatio	on to keep below nuisance dust limit of 15mg/	/m³.			
Handling:	Avoid contact with the eyes. Avoid repeated or prolonged contact with the skin or clothing. Avoid dust inhalation. Contact lenses should not be worn.					
Storage:	incompatibles. Avoid contamination	, dry, isolated, well ventilated area away fron ion with other "look alike" materials that may I instructions. Avoid containers, piping or fit ed metals.	produce a fire or explosion. Special			
Section VIII - Expo	osure Controls/Personal I	Protection				
Engineering Controls:	Provide local or genera	al ventilation to keep below nuisance dust lim	it of 15mg/m ³ .			
Personal Protection: Eye Protection:		goggles to prevent eye contact. Do not wear				
Protective Clothing:	•	ective clothing to prevent skin contact				
Respiratory Protection:		SH approved equipment when airborne dust ust be available for non-routine and emerger				
Other Protective Cloth Equipment:	ing or Normally not required					
Section IX - Physi	cal and Chemical Proper	ties				
Appearance/Color/Odo	r: White solid, spherical c	or granular shape with slight ammonia odor.				
Melting Point/Range:	271°F or 133°C	Boiling Point:	135°C (decomposes)			
Solubility in Water:	1,193 g/L at 25°C	Boiling Point/Range:	Not Applicable			
Specific Gravity:	Not Applicable	Vapor Pressure(mmHg):	80 Pa at 20 ^o C (calculated)			
•	Not Applicable	Molecular Weight:	60.07			
Vapor Density:	P.P					
Vapor Density: Bulk Density:	44 - 49 lbs/cu ft	% Volatiles:	Not Applicable			
Vapor Density: Bulk Density: pH:	44 - 49 lbs/cu ft 7.2 at 100 g/L	% Volatiles: Evaporation Rate:	Not Applicable Not Applicable			

Product Name: Urea, Dry Page 3 of 4

Section X - Stability and Reactivity

Stability: This product is stable under normal ambient conditions of temperature and pressure.

Hazardous

Polymerization: Will not occur

Conditions to Avoid:

May slowly hydrolyze to Ammonium Carbamate after a long period of time which decomposes to Ammonia and

Carbon Dioxide.

Materials to Avoid (Incompatibilities):

Avoid contact with strong oxidizers, acids or bases. Avoid contact with Nitrates. Reacts with Sodium or Calcium Hypochlorite to form explosive Nitrogen Trichloride.

(Incompatibilities):

Hazardous Decomposition

Decomposes to Ammonia, Biuret, Nitrogen Oxides, Carbon Oxides.

Products:

Section XI - Toxicological Information

Significant Routes of Exposure:

Eyes, Digestive Tract, Respiratory Tract, Skin

Toxicity to Animals:

Acute Oral Toxicity: (rat) LD₅₀=14,300 - 15,000 mg/kg; (mouse) LD₅₀=11,500 - 13,000 mg/kg.; (cattle): LD₅₀=510

mg/kg.

Repeated Dose: (rat) 24 weeks; dermal – NOAEL = 40% in ointment Skin Irritation/Corrosion: Mouse – Not irritating (10% solution) Eye Irritation/Corrosion: Rabbit – Not irritating (50% solution)

Not found to be toxic by oral exposure as defined by OSHA. Based on toxicity data for another compound (i.e., ammonium nitrate), not expected to be toxic by dermal and inhalation exposure as defined by OSHA.

Special Remarks on Toxicity to Animals:

Bacterial Genetic Toxicity *in vitro*: (Salmonella typhimurium) – Bacterial reverse mutation assay- Negative; Chinese Hamster -- Chromosomal aberration test – Positive (very high dose); Mouse – Positive (very high dose).

Genetic Toxicity in vivo: Mouse – Bone marrow cytogenetic test – Positive (extremely high dose):

Toxicity to Reproduction: No toxic effects on mouse gonads up to 6,750-mg/kg day. No toxic effects on rat gonads

up to 2,250-mg/kg day. **Developmental Toxicity / Teratogenicity:** Not teratogenic.

Other Effects on

Humans:

Despite extensive medical use, no significant side effects on humans have been noted.

Special Remarks on Chronic Effects on No chronic effects known.

Humans:
Special Remarks on

May be irritating at > 10% concentration; not a skin sensitizer.

Other Effects on

Despite extensive medical uses no significant side effects on humans has been noted.

Humans:

Section XII - Ecological Information

Ecotoxicity: Acute Toxicity to Fish: 96 -h:(Barillius barna) $LC_{50} = 9,100 \text{ mg/L}$. Acute Toxicity Aquatic Invertebrates:

(Daphnia magna): 24 - h EC_{50} : > 10,000 mg/L . Toxicity to Aquatic Plants: (Scenadesmus quadricauda) 192-hr cell multiplication inhibition test-TT>10,000 mg/L. Toxicity to Other Non-Mammalian Terrestrial Species: (Pigeon)-Subcutaneous- LD_{LO} =16,000 mg/kg. Since Urea is a fertilizer, it may promote eutrophication in waterways. Non-toxic

to aquatic organisms as defined by USEPA.

Environmental Fate: Stability in water: $T_{1/2} > 1$ year. Transport: 0.16% in air; 99.84% in water

Toxicity: No known toxicity

Degradation Products:

Biodegradation: Ultimately biodegradable.

Section XIII - Disposal Considerations

Product Disposal: Disposal of Urea may be subject to federal, state or local regulations.

General Comments: Users of this product should review their operations in terms of applicable federal, state and local laws and

regulations, then consult with appropriate regulatory agencies before discharging or disposing of waste material.
